April 14, 1965

415 N. WARWICK AVENUE
BALTIMORE, MARYLAND 21223

Phone: 945 - 1830 - 1831 - 1832

Mr. J. Edwin Myers
United Evangelical Church School
East Avenue and Dillon Street
Baltimore, Maryland 21224

Dear Mr. Myers:

We are pleased to bid on one air conditioner for your Fellowship Hall which we believe would take care of you always when you are having a meeting from ten to twenty people. However, when you are having a meeting of from 100 to 150 people, you would have to run this unit all day to be sure it was adequate. This unit is 29,000 BTU capacity, 230/208 volt, with a list price of \$609.50. Your cost installed would be \$430.90 which includes five year warranty on the compressor and all parts. This is an unusual warranty as most units only carry a five year warranty on the compressor.

We would also like to bid on two 24,000 BTU units which would be one installed in the second window and one in the last window. This would be adequate to take care of 150 people on the hottest day. You may only run one of these units sometime. These units are 230/208 volt. They have a list price of \$569.50 each and would cost you for both units delivered and installed \$780.00. These units are also guaranteed for five years which includes compressor and all parts. No other unit built today has this type of guarantee. All three of these units are Amana which are considered the finest built.

Thanking you for an answer at the very earliest date, we are

Yours very truly,

THE MAC FORD COMPANY
