

Dear Customer:

For many reasons, this year, as you can see, we are trying a different method of serving our carry out customers. We feel that since most of our customers take the super home and reheat it in various ways themselves, dispensing your food in prepackaged containers will allow us to more rapidly serve you your dinner and allow you a better way to reheat the contents. The contents of the containers can be heated in the microwave and the containers are dishwasher safe.

Please return the inclosed envelope with any comments or suggestions you may have regarding our method of serving our customers. Our prime concern is your satisfaction with our product and your comments will allow us to serve you more efficiently and effectively in the future.
