Attention: Mr. George Tuerk

Dear Mr. Tuerk:

In response to your telephone request, we furnished labor and equipment to examine your Pacific Boiler MD. No. 45214-H, re-rolled approximately fifteen tubes, tested and found boiler tight.

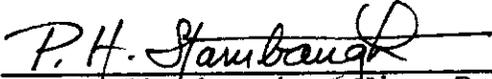

Since we re-tubed this same boiler in June of this year, we are not forwarding an invoice on today's service.

Our men reported that the ducts on your second Pacific Boiler should be cleaned and the tubes rodded to ready the boiler for peak efficiency for the coming heating season. We quote an approximate \$600.00 to do this, plus any necessary materials such as new gaskets. This would cover a day and one-half. If we finish this in one day, the price will reflect the saving. You might want to discuss this preventive maintenance with your board.

We appreciate your business, and if we can help you with these boilers or any of our related services, please feel free to call on us.

Very truly yours,

HARVEY A. STAMBAUGH & SONS, INC.
