

## Work Projects For Separation of School Building

1. BGE to relocate 6" gas service to Friendship Hall
2. Plumber to relocate interior gas lines to meet new service, cut into existing gas lines and abandon all gas lines from school building.
3. Abandon Gas and steam, and electric lines from boiler heating school building, abandon boiler.
4. Balto. City to relocate 4" water line to Friendship Hall.
5. Plumber to install and reconnect water lines inside building and abandon and cap off water lines going to school building.
6. Electrician to relocate electric line to Friendship Hall and abandon all electric circuits and equipment feeding school building.
7. Sprint to remove electric and communications equipment from school building.
8. Necessary to block up three doors on school side of Bell Tower and install access stairwell from Narthex to fourth floor. Abandon bathroom on second floor of Tower.
9. Plumber to cap and abandon sewer lines from school building to Church building.
10. Relocate three story chimney away from school building and make free standing.
11. Block up five doors in rear stairwell and finish inside walls, abandon water and sewer lines to bathroom on first floor level.
12. Necessary to repair lintels and walls at third and fourth floor levels and repoint and seal windows.

This is just a rough idea of some of the work which would have to be done to prepare to school building for sale. The more these jobs would be detailed the more of a cost estimate could be made. As of now this project would cost a substantial amount to undertake.
