

Building Use Committee Update

April 5, 2004

The committee has decided to keep the congregation updated often so as not to have rumors spreading about the future of our school building, at present we have made contact with several community people such as Senator Mikulski, Southeast Community Organization, Canton Community Association, Pete Hammon, Ed Hale of 1st. Mariner Bank, Peter Merles of Southeast Senior Housing, among others, we are surveying the cost of the buildings upkeep, the possibilities of renting, leasing or donating parts or all of the building , possibility of sales of the building as opposed to rent or lease, we are investigating any and all avenues so as to help our Church make better use of this building, as all of you know by now it has been getting expensive to upkeep this old building so we are looking at every possible means to offset this expense. We will keep everyone informed as we go and everyone will be informed of our findings when everything has been investigated.
