

Pastoral Work Analysis

work unit = a morning, afternoon
or evening devoted to
work of the church.

Normal work load = 40 work units
per month, which is equivalent to
5 days labor expended by any
normal worker.

Calls in May
 used free Thurs pm and other
 night in calls on young couples.

Computation of
total time

22 weeks - Jan thru May.

10 work units per week
spent by ordinary worker

220 total work units expended
from Jan thru May.

My record for same length
of time was 339 work units
expended or an average of
68 per month.

June 1972
